- Problem solving
- Adaptability
- Client communication
- Attention to detail
- Ownership
- Continuous learning

LANGUAGES

English

PROFILE

Web developer based in Kampala with hands-on experience across WordPress, front-end development, UI/UX and the infrastructure underneath: hosting, domains, DNS and SSL. I build responsive, business-focused websites and stay responsible for them after launch.

Three years of development and IT work at Yunga Technologies Uganda grounded the way I work now, and earlier roles in sales and marketing shaped how I handle clients. Where my experience with a technology is still developing, I say so rather than overstate it.

EXPERIENCE

Web Development and Contract Projects

2026 to present

Independent Practice, Kampala

- WordPress development, website redesign and maintenance contracts, including an ongoing locum website development engagement with Marie Stopes Uganda.
- Content architecture, responsive implementation, performance, accessibility and SEO improvement.
- Direct client consultation, scoping and handover.

Web Developer / IT Personnel

2022 to 2025

Yunga Technologies Uganda Ltd

- Website development and theme customisation, plus ongoing maintenance, updates and backups on live sites.
- Client support, technical troubleshooting across web and hardware, and content management.
- Digital solutions delivery alongside sales and client engagement support.

Marketing Strategist / Marketeer

Angel Wood Academy

- Digital promotion, campaign activity and marketing strategy for an education institution.
- Transferable to web work: positioning and messaging, writing for a specific audience, and understanding what actually drives an enquiry.

Sales Officer

2019 to 2020

VendorsPoint Uganda

- Client communication, needs assessment and sales against targets.
- Transferable to web work: translating requirements into proposals and holding client relationships over the long term.

SELECTED PROJECTS

Marie Stopes Uganda

mariestopes.or.ug

Locum Website Developer, ongoing

WordPress and Gutenberg build work, content architecture, responsive design, performance, accessibility and SEO for a health organisation.

Beauty Crib

beautycrib.ug

Web Developer / UI Designer

Live editorial e-commerce storefront. WooCommerce catalogue and checkout, UX pricing, MTN and Airtel Mobile Money alongside card payments.

PearlOxy Uganda

pearloxy.net

Web Developer

Corporate site for a biomedical startup working on medical oxygen access, written to serve healthcare partners, investors and the public at once.

SELECTED PROJECTS, CONTINUED

Full case studies for each of these are on the portfolio site.

Yunga Technologies Uganda

yunga-ug.com

Web Developer / IT Personnel

Website development, maintenance, client support and technical troubleshooting across three years in a Ugandan technology company.

Uganda Rent App

Mobile App Developer

Cross-platform rental app built with Flutter: one Dart codebase for Android and iOS, with search, saved listings and landlord messaging.

Elohim Khen Collection

Mobile App Developer

Fashion commerce platform. FlutterFlow customer app on Supabase with reels, points, online and cash-on-delivery payment and delivery tracking, plus merchant, delivery and admin tooling.

Lumi Guard Health

lumiguardhealth.com

Web Developer

Site for a clean-energy social enterprise bringing solar lighting to rural communities, framed around both the product and its health outcome.

Zentry Power

zentrypower.com

Web Developer

Corporate product site for an energy and revenue protection company, structured to be credible to technical and commercial readers alike.

RecyclePay Uganda

recyclepay.ug

Web Developer

Explanation-first site for a recycling and waste-value service, sequencing the homepage so an unfamiliar model makes sense before it sells.

Merryland High School Katabi

Web Developer

School website organised around what parents actually arrive for: admissions, academics, school life and contact.

SERVICES

WordPress development · Website design and redesign · SEO and performance · Website maintenance · Hosting, domains and migration · UI/UX design · Mobile app development (Flutter) · Technical support
